6.0 Scope Of Services

Solar PV System

- Your Solar PV system is consisting of Solar Modules, Solar Inverter with a comprehensive
- Management Facility & Complete Mounting Structure (On-roof).

The Process

- Photovoltaic (PV) cells convert sun light to direct current (DC) electricity.
- The inverter converts DC into alternating current (AC) electricity.

6.0 Scope Of Services

Inverter Modules

Single Phase Inverter

Three Phase Inverter

Micro Inverter

Kit

1. Founded by a German Doctor and our elite team has strong R&D capabilities. We concentrate on inverters under 50kW. Professionalism and focus ensure the high quality of our products.
2. Our inverters and accessories provide a standard 5-year warranty, the second generation and micro inverter even 10-year free warranty.

Superior Materials

As a best Contractor we are guarantees high-quality and best performance of photovoltaic modules using only superior raw materials and components from Tier 1 Grade a supplier.

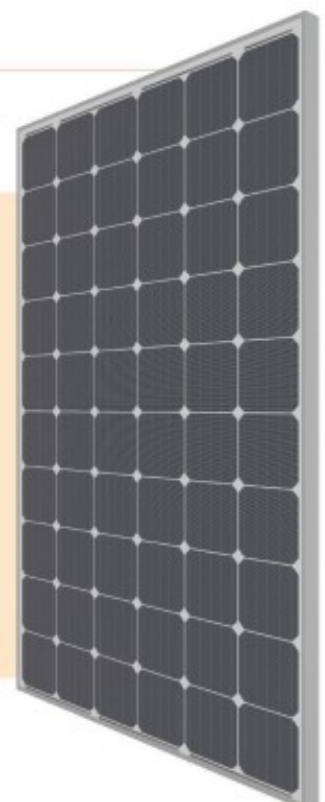

Modules

1. A wide range of photovoltaic modules in different performance and technology.
2. All our photovoltaic modules can be performed with Smart Hot Spot Free Technology implementation.

0322.0866 High performance module M315-60-w U40

Glass-film / monocrystalline / 315Wp / white / 40mm U-frame

It is owed to state-of-the-art spectral optimization that Megasol modules perform up to 15 % better than customary modules under cloudy conditions and during dusk or dawn. The monocrystalline Megasol module with 40 mm frame is Switzerland's best-selling solar module.

6.0 Scope Of Services

Our Expertise

Our strategic partnership possess;

- 10 Years Solar Experience
- 2 Production Bases (Wuxi, Jiangsu: 600MW and the other is in Malaysia, 400MW)
- 1GW Production Capacity
- 100% Automated Lines
- 5GWSolar Panels Shipment
- More than 100 partners worldwide
- Over 2000 retailers worldwide

Types of Projects

At Solar Power Komasi Engineering Sdn. Bhd., we have a range of products, services and providing funding facilities to all kinds of projects including;

1. Household Projects
2. Commercial Projects
3. Utility Projects
4. Solar Projects
5. Thermal Energy Projects
6. Battery with Storage Projects

Whether it's Solar for your Home or Company, we provide the best service by;

- Preliminary site Visit and Consultation
- System Design and Support
- Installation and Commissioning

Key responsibilities of Solar Power Partners

Operation & Maintenance:

1. Replacement of Inverters if needed after 10-year warranty expires.
2. Replace of broken cables and other BOS products
3. Replace of damage or defective panels
4. Pressure wash of panels twice a year
5. Frequent Isolator checkups
6. DC checkups
7. Cleaning of Inverter cooling fans when needed
8. Attend to all warranty issues
9. Getting an insurance coverage for Natural disasters (mentioned in the agreement)
10. Pay a monthly insurance premium.

6.0 Scope Of Services

- System owners often ask us "how do I maintain my solar panels to ensure maximum electricity production?" As with any revenue generating asset, solar owners should always be looking for ways to increase revenue while simultaneously decreasing costs. To that end, keeping your solar system at peak efficiency with solar maintenance is critical to ensuring maximum return on investment (ROI).
- Solar panels that are properly maintained can last for many years. Solar Power Partners provides solar service, solar maintenance, operations and maintenance, solar asset management, distributed energy asset management, battery backup and off-grid O&M services.
- Solar panels generally require little maintenance. They're extremely durable and typically should last for many years. However, any issues with solar panel performance are usually related to electricity production, which is why we recommend monitoring your system's production. By paying attention to changes in production, you can identify and address issues proactively.
